1. Geography

The Kingdom of Denmark includes Denmark, the Faroe Islands, and Greenland.¹ Denmark comprises the peninsula of Jutland and 482 islands.

The size of Denmark is as follows (1960):

Jutland peninsula	29,633 sq. kilometers (11,441 sq. miles)
99 inhabited islands	13,363 sq. kilometers (5,160 sq. miles)
383 uninhabited islands	47 sq. kilometers (18 sq. miles)
Metropolitan Denmark	43,043 sq. kilometers (16,619 sq. miles)

Whereas the land frontier with Germany is only 67.7 kilometers (42 miles), the coastline is over 7,400 kilometers (4,600 miles).

Denmark's position on the North Sea has brought advantages through proximity to some of the most densely populated industrial states of Western Europe. It is a land-bridge between Scandinavia and Central Europe.

Denmark is a low lying country, with its highest point, Yding Skovhøi, 568 feet above sea level.

In Denmark, there are 76 lakes, which have areas exceeding 0.19 square miles.

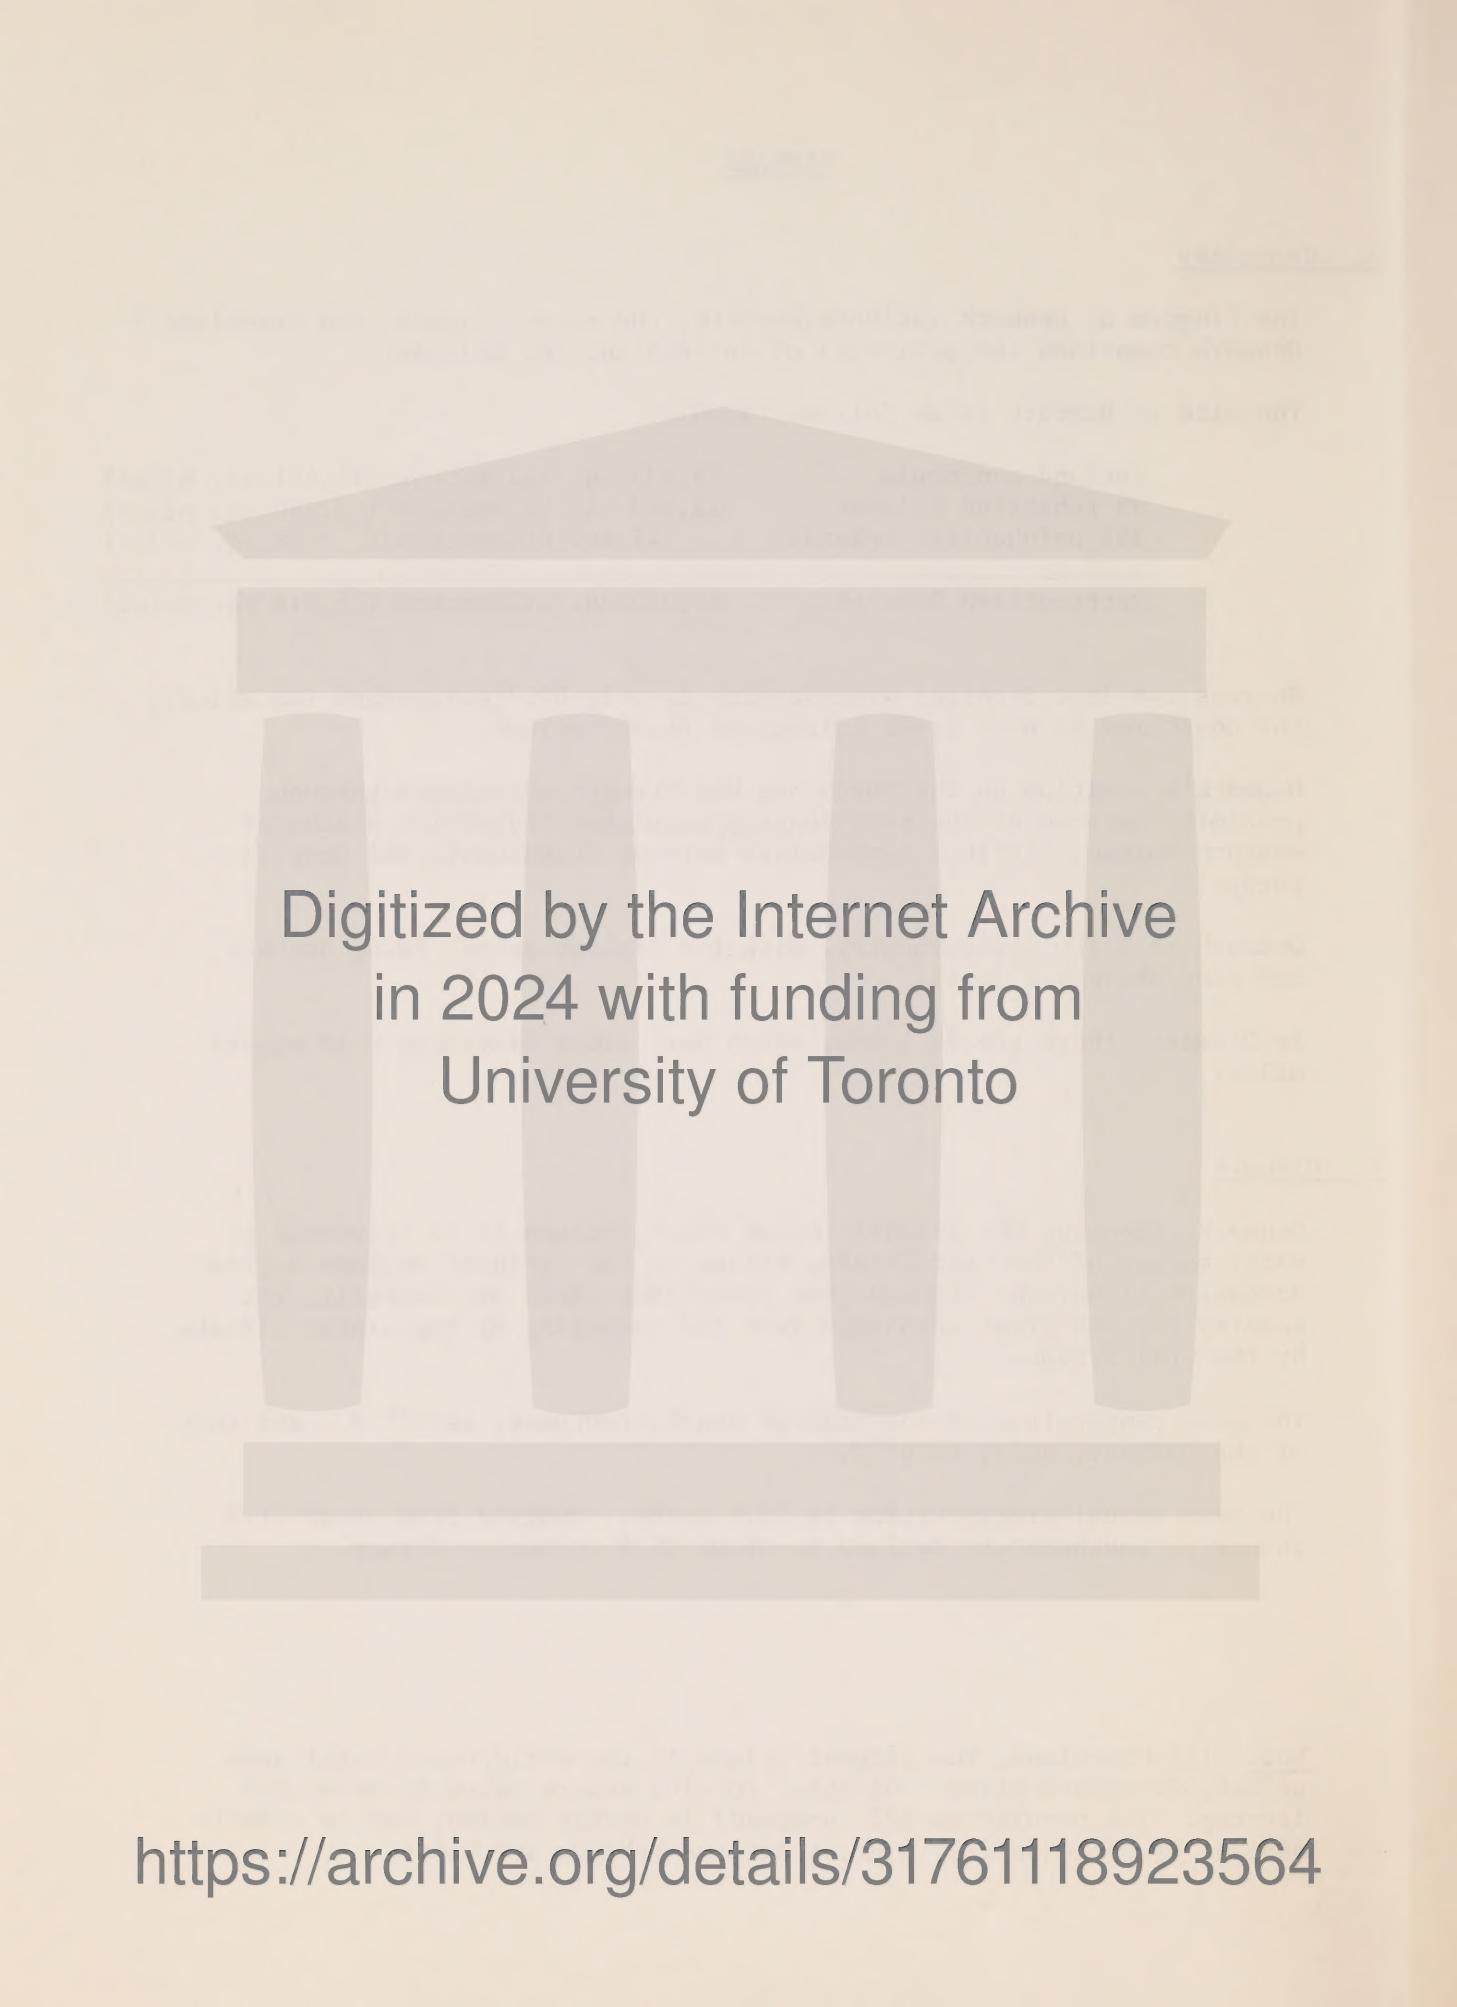

2. Climate

Denmark, fronting the Atlantic Ocean which, because it is traversed by water masses of the Gulf Stream, brings to the northern regions a great accession of warmth. Because the prevailing winds are westerly, the country derives great advantage from the tempering of the winter climate by the Gulf Stream.

The mean temperature of the coldest month, February, is 32° F., and that of the warmest, July, 62.6° F.

The mean annual precipitation is 23.6 inches, ranging from about 31.5 inches in southwestern Jutland to about 15.8 inches in Spragø.

Note: (1) Greenland, the largest island in the world, has a total area of 840,000 square miles. Of this, 708,100 square miles is under the ice cap. The population (33 thousand) is partly Eskimo, but is chiefly made up of Greenlanders, a cross between Eskimos and Danes.

3. Population

The population of Denmark (est. 1964) is 4,703,100. The population density averages 277 per square mile.

The only non-Danish minority is a German element in South Jutland numbering about 30,000 or less than 0.7% of the population.

Principal Towns in Denmark are: (Population 1964)

4. Government and Constitution

Denmark is a constitutional monarchy. The Danish Constitution of June 5, 1849, has been revised four times, most recently on June 5, 1953.

The legislative power is vested jointly with the King and the Parliament (Folketing). Executive power is exercised by the King through his ministers. The Folketing is a unicameral Parliament, elected by and from Danish subjects of 21 and over. The Faroe Islands and Greenland are each represented by two members.

5. Economy - General

In recent years the economic structure of Denmark has undergone a rapid change in consequence of a vigorous industrial expansion. Manufactures now hold a major position in the economy and their importance as a source of employment is growing.

In the past ten years manufacturing has increased its contribution to the rapidly growing national product by 75%, industrial employment is up by more than a third, in spite of extensive automation, and industrial exports have trebled to a grand total of more than \$1 billion.

5a. Transport

As Denmark is an archipelago, its communications are a close combination of land and sea traffic. Ferry and inland liner services co-operate with the railway network. Railway transport is principally provided by the Danish State Railways.

A dense network of roads covers the country. Public passenger transport is catered for by a dense network of bus and coach services.

Danish merchant marine, 1961 - 1966, in thousand gross tons, was as follows:

	<u>Total</u>	<u>Tankers</u>
1961	2,307	914
1962	2,399	877
1963	2,418	875
1964	2,431	884
1965	2,562	975
1966	2,839	1,120

(Source: United Nations: Statistical Yearbook.)

Civil air services are provided by several foreign air companies and the Scandinavian Airlines System.

For a long time there has been a close connection between Danish shipping and Danish shipbuilding. Of the 760 units in the merchant fleet, 353 ships of 1,495,000 g.r.t. or 66% of the total tonnage were built at Danish yards.

6. Agriculture

Distribution of land (1963 - '000 hectares) is as follows:

<u>Total Area</u>	<u>Land Area</u>	<u>Arable Land</u>	<u>Meadow and Pasture</u>	<u>Forests</u>	<u>Other Land</u>
4,303	4,293	2,817	343	438	595

(Source: The Europa Yearbook.)

Current Danish agricultural policy is directed in particular to maintaining the existing agricultural properties as personally owned independent holdings and improving land distribution.

The land in Denmark is split up among many holders. There are about 190,000 independent holdings. Of these, about 85,000 are of less than 10 hectares (24.7 acres). Danish holdings are worked entirely by the owner and his family. Of the total of about 300,000 persons fully engaged in agriculture, over half (170,000) are farm owners and their families.

Agriculture is the largest Danish export industry. The value of selected agricultural exports in 1965 were as follows:

Live Animals	617 million kr.
Meat and Meat Products	3,628 million kr.
Dairy Produce	1,551 million kr.
<hr/>	
	5,796 million kr.

The largest individual agricultural export items are bacon and pork.

Danish agriculture is organized on a co-operative basis. The co-operatives are fundamental to Danish agriculture.

Denmark's selected agricultural data are as follows:

1961	637.5
1962	785.1
1963	847.9

7. Forestry

The forest area of Denmark is about 10% of the total land area.

Of the total forest area in Denmark (1951)

129,300 hectares are Broadleaf trees
of which 85,200 hectares are beech
211,200 hectares are conifers
of which 116,400 hectares are spruce

Of the total production in Denmark, 1965, of 1.9 million cubic metres of round wood, 1.0 million was Coniferous.

8. Mining

The minerals in Denmark are limited. Except for some building materials there are no raw materials of importance, and the only domestic fuels are brown coal and peat.

9. Industry

Danish industry is mainly the creation of free enterprise, and the great majority of the establishments are owned by private individuals and companies. Just under half of the country's industry is located in the Greater Copenhagen area.

Industry production in Denmark, 1963 - 1965, was as follows:

('000 Kr.)

	1963	1964	1965
Food, Beverages, Tobacco . . .	5,662,000	6,201,000	6,363,000

TOTAL . . .	23,801,000	27,079,000	29,413,000

Source: The Europe Yearbook.

It is a notable fact that the second largest group is Iron and Metal Industries, in spite of the especial absence of raw materials for this industry.

The largest group is the production of food, beverages and tobacco. A large proportion of the production of these goods is exported.

The textile mills work up imported materials. The textile and clothing industries have successfully entered the export market.

The woodworking industry includes high-standard furniture, factory, which also do a large-scale export trade.

In Denmark, there is also a large papermaking industry, though no production of newsprint.

Danish industries are highly export-oriented. About a quarter of the total Danish output of manufactured goods is exported.

10. Electricity

Energy consumption in Denmark, 1962 - 1965, in million tons of coal equivalent, was as follows:

1962	15.64
1963	17.40
1964	18.70
1965	19.85

The total installed capacity of electric energy in Denmark in '000 Kw., 1962 - 1965, was as follows:

1960	1,953
1961	2,150
1962	2,272
1963	2,373
1964	2,429
1965	2,775

(Source: United Nations: Statistical Yearbook.)

Denmark is an energy deficient country which possesses negligible energy resources. However, the advent of large-scale natural gas in Western Europe has given hope to the North Sea countries.

Denmark has no hydro power potential, no significant fossil fuel reserves except for some lignite in Jutland, which is presently used in power stations but is expected to be exhausted before 1975.

11. Nuclear Energy

In Denmark so far, no formal program for nuclear power has been made public. However, the future of nuclear power in Denmark is assured. Danish Government, in association of power utilities, ship owners, ship building and other industries, founded in 1956, "Donatom". The Isefjord Power Works Inc. plans to build the first nuclear station in Denmark.

12. G.N.P.

According to International Monetary Fund, Denmark's Gross National Product 1960 - 1965, in Billions of Kroner, was as follows:

1960	41.13
1961	45.58
1962	51.37
1963	54.65
1964	61.72

13. Foreign Trade

Denmark's foreign trade represents close to one-third of its G.N.P. It is, therefore, an important determinant of the economy's overall growth. That is, foreign exchange earnings have been a vehicle through which domestic economic development could be financed.

Large imports of raw materials are necessary to the maintenance of a high level of Danish industrial and agricultural production.

Denmark's total exports rose from 9,500 kroner in 1956 to 16,600 million kroner in 1966, that is, by 74%. The increase, however, varied considerably between various markets.

Denmark's foreign trade, 1964 - 1965, was as follows:

16. Balance of Payments

The great dependence on foreign trade has the effect that the trend in the Balance of Payments is an extremely important factor in determining economic policy.

Danish Balance of Payments, 1958 - 1966, was as follows:

	<u>1958</u>	<u>1963</u>	<u>1964</u>	<u>1965</u>	<u>1966</u>
Government Finance,² million kroner					
Income:	Taxes and Duties	8,700	15,400	17,600	20,700

	Surplus on Current and Investment Accounts	600	800	1,100	1,100
					1,500

17. Economic and Trade Policy

Denmark's trade policy is directed toward expansion of exports, liberalization of imports and maintenance of relatively low custom's duties.

Denmark's trade policy is greatly influenced by its economic and financial obligations to other countries as a result of membership to various international groups including European Free Trade Association (EFTA), Organization of Economic Cooperation and Development (OECD), GATT and International Monetary Fund.

18. Conclusion

The country's level of living is reflected in its relatively large import volume, which approximates \$600 per capita, and in its per capita ownership of motor vehicles.

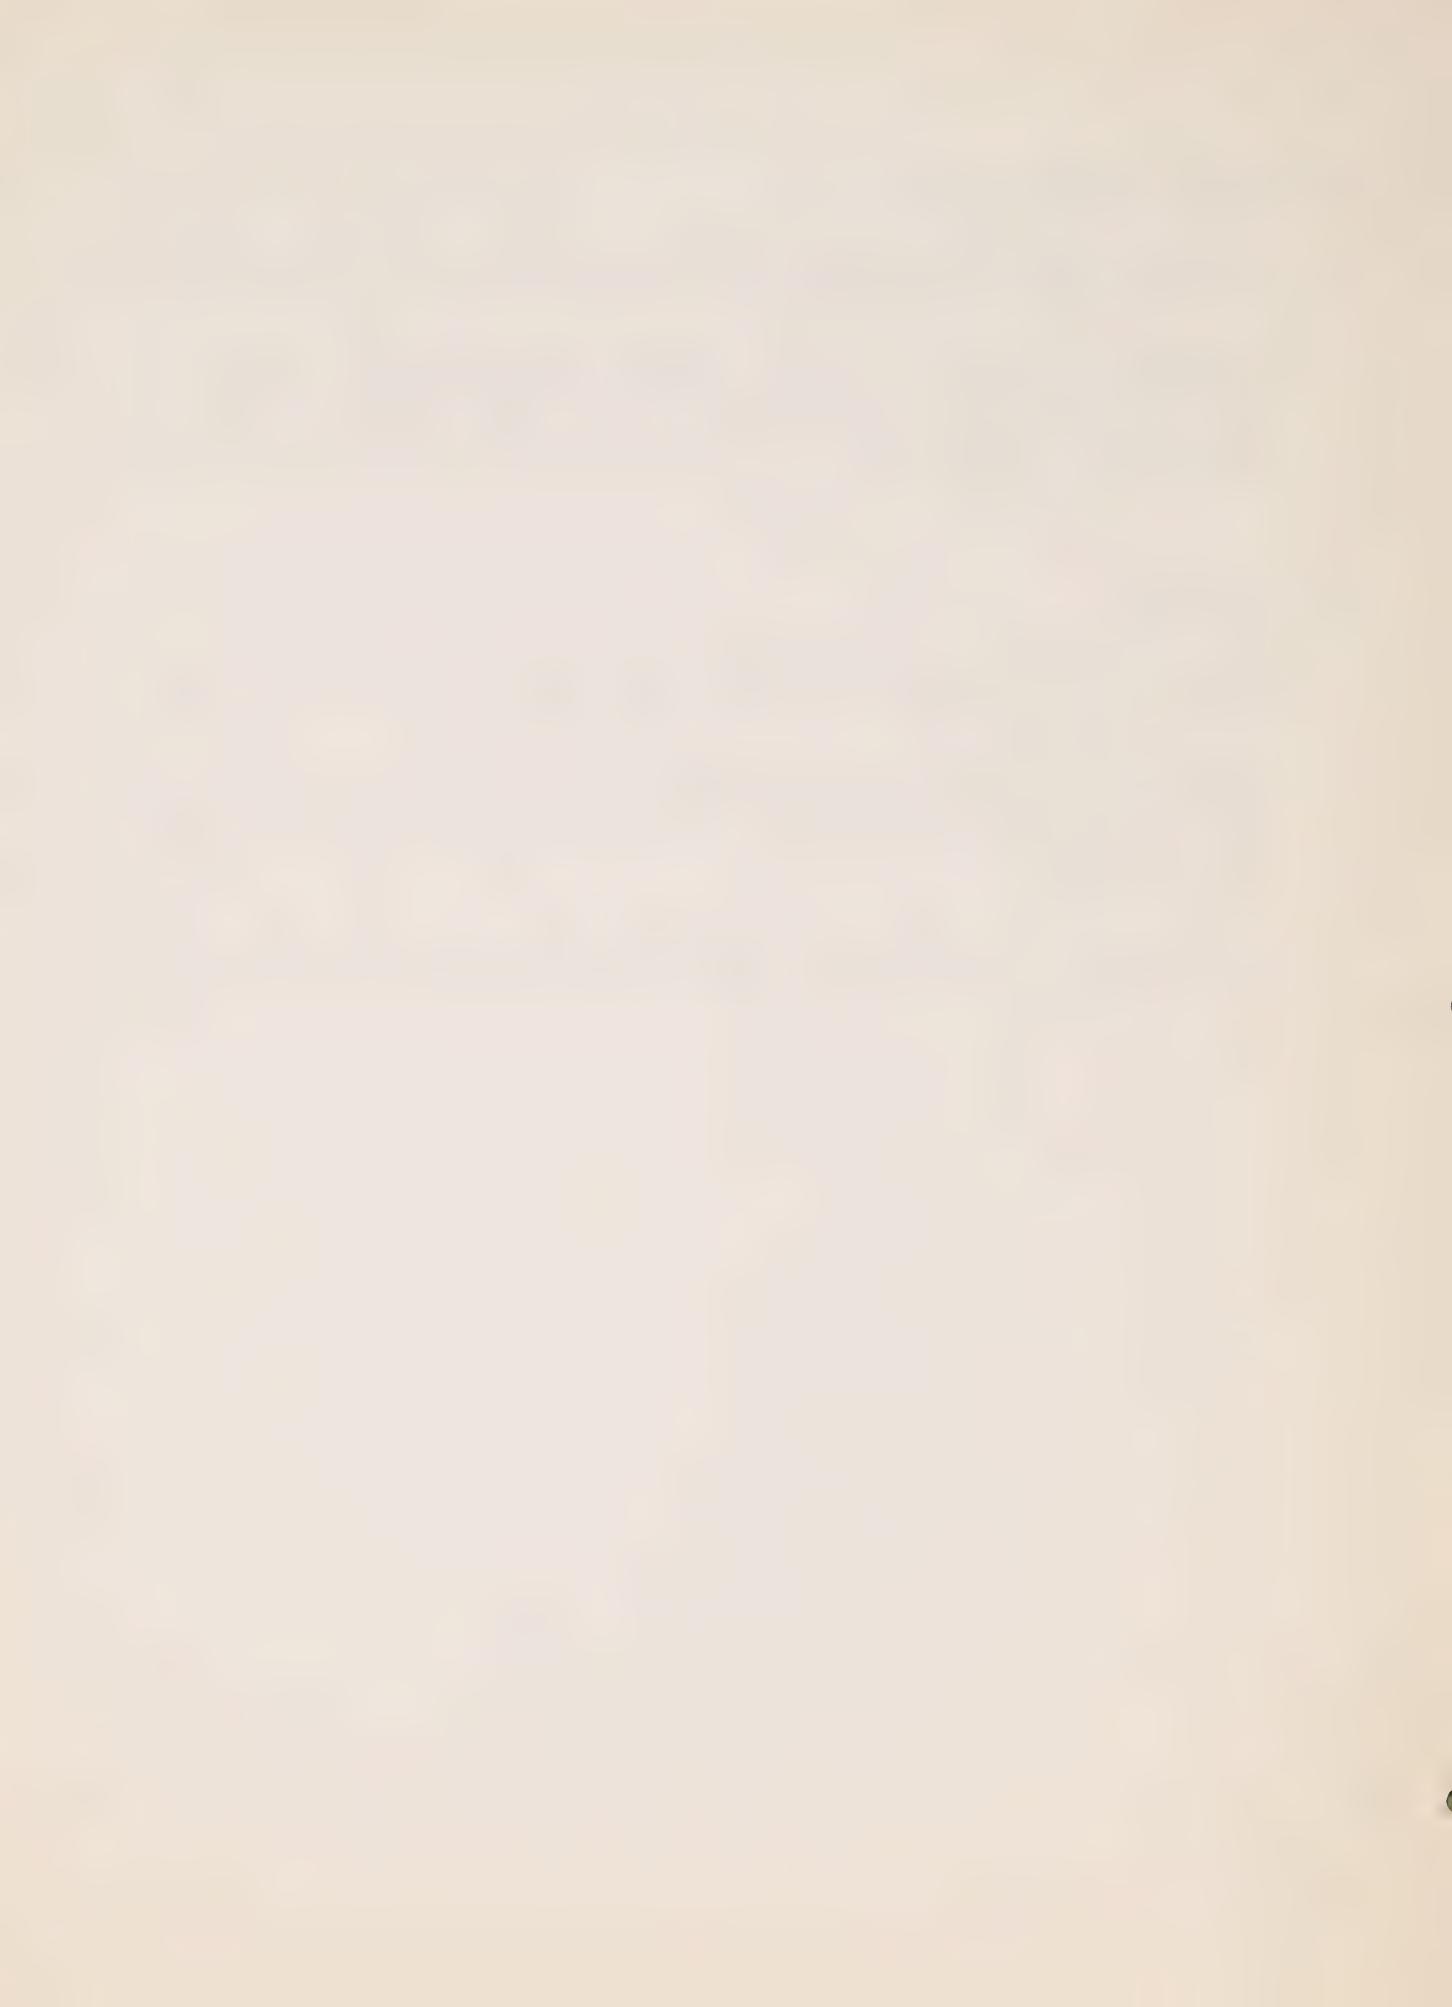

The population is highly urbanized (about 75%) and Copenhagen, Denmark's largest city, has 28% of all the country's inhabitants. This concentration of population in the cities is consistent with the nation's growing industrialization.

The fight to remain competitive has pushed Danish firms into plant modernization programs in an attempt to improve productive efficiency.
